

WORLDWIDE STAMP PRODUCER TRODAT

This company with headquarters in Wels Austria is certified according to the international environmental management norm ISO 14001.

They see themselves with a responsibility to protect the environment.

“We attach a high importance to any relevant products focusing their attention towards Protecting the environment,” says engineer Herbert Pözlberger; Head Facility at Trodat Austria.

For this reason we install a EWO water revitalization device in 2005, before the project environmental management system ISO 14001 of Trodat (UMS) began.

The results, after we installed the EWO technology in are cooling circuits and are fresh water heating system was astounding, we never expected such a sweeping success.

The reinvestment time for the complete system was 18 months. We save 7.500. – Euros on chemicals, plus reduce the maintenance work on are system. We also relieved the burden on the environment by not using the chemicals. We are very content with are decision, and would like to thank EWO for an excellent product. We strongly recommend this product to everyone.

Herbert Pözlberger
