

REFERENCE – drinking water

Brewery Puntigamer, 8055 Graz-Puntigam, Austria

Products: CLASSIC 4"

In the brewery Puntigamer, the water is revived by the natural EWO method since 2002.

In Puntigam near Graz, a wonderful beer has been brewed since 1478. Initially brewed only for its own beer inn, thanks to brisk demand, the business will be rapidly expanded and expanded over the following years.

This makes Puntigamer Austria's best-selling beer!

The EWO CLASSIC 4 "unit is installed in the riser of the artesian well, which collects the water from 270m depth.

In order to restore the original water quality after the pump and to have as natural as possible water for the brewing process, the natural EWO water revitalization was installed.

The master brewer and the technicians are very satisfied with the improved water quality and are happy about this relatively small, absolutely maintenance-free investment.

„With the lively brewing water, our beer is very tasty and has the typical round finish when drinking!“

Peter Fliesser
Head of Department

„We feel that our beer tastes even better“

Herr Zanker
Director
