

## REFERENCE – drinking water Single family home, Lausanne, Switzerland

**Products:** CLASSIC 1"

An EWO CLASSIC water revitalizer was installed in the main water distribution more than 5 years ago.

**details of the system:**

The water fed in has a hardness of 13 ° German hardness on average.

The 250 liter content of the non-potable water tank are heated by a heat pump up to 55° C.

**target of application:**

Optimization of the municipal water and prevention of limescale deposits in the system, mainly in the hot water tank.

**results after more than 5 years:**

*"The condition of the bundles of tubes, which are especially susceptible to limescale, is like new.*

*Even after more than 5 years, no limescale is present."*
